		FYI	HAZARD ANALYSIS CRITICAL CONTROL POINT	
			- Keep potentially hazardous food requiring time/temperature controls for safety out of the temperature danger zone of 41° F – 135° F [use a clean and sanitized food temperature measuring device with metal-stem to monitor internal food temperatures]	
			- Wash hands frequently at hand sink, especially before using gloves – double hand washing required after using the restroom	
			- Make sure all containers of food & drink are properly labeled w/ <u>name</u> and <u>date & time</u> of opening of package, in addition to the <u>date & time</u> when the food was placed into the container; discard PHF under refrigeration after a maximum of 7 days	
			- Store raw foods on bottom shelves of refrigeration & freezing units, below ready-to-eat foods, to prevent cross-contamination	
			- Recommend documenting temperatures of refrigeration units, freezing units, hot-holding units, internal food temperatures, sanitizer concentrations, etc., on a log sheet
