Consumer safety is our top priority. Consumers are reminded to wash their hands, work surfaces, and utensils thoroughly after contact with raw dough products or flour, and to never eat raw dough or batter. The Centers for Disease Control (CDC) warns consumers to not consume raw products

made with flour. E. coli O26 is killed by heat through baking, frying, sautéing, or boiling products made with flour.

For more information, refer to the following: <https://www.cdc.gov/features/no-raw-dough/index.html>.

Symptoms of E. coli O26 illness include acute, often bloody diarrheal illness and abdominal cramps. Most people recover within a week. However, children, the elderly, and immunosuppressed individuals may develop hemolytic uremic syndrome (HUS), a severe illness which may cause the kidneys to fail.

Bakers have trusted King Arthur Flour products in their kitchens for over 225 years and because of that trust we have issued this voluntary recall. We remain committed to providing our consumers safe and superior products.
