Food & Beverages

**Reason for Announcement:**

*Clostridium botulinum*

**Company Name:**

Mill Stream Corp.

**Brand Name:**

Mill Stream Corp.

**Product Description:**

Cold Smoked Salmon

---

## FDA Announcement

**Mill Stream Corp. (Sullivan Harbor Farm) of Hancock, Maine** is voluntarily recalling ten lots of Cold Smoked Salmon because it has the potential to be contaminated with *Clostridium botulinum*, a bacterium which can cause life-threatening illness or death. Consumers are warned not to use the product even if it does not look or smell spoiled.

Botulism, a potentially fatal form of food poisoning, can cause the following symptoms: general weakness, dizziness, double-vision and trouble with speaking or swallowing. Difficulty in breathing, weakness of other muscles, abdominal distension and constipation may also be common symptoms. People experiencing these problems should seek immediate medical attention.

No illnesses have been reported to date.

The recall was initiated because the product's water phase salt (WPS) tested below 3.5%. This was discovered upon re-review of laboratory certificates, which were found to have incorrectly reported WPS levels. Labeling instructions state to keep refrigerated at or below 38°F and that the product may be frozen. Because the WPS is under 3.5% the product must **remain frozen** until ready to consume. Product stored in the refrigerator after thawing has the potential to be contaminated with *Clostridium botulinum*.

The recalled product was sold between March 6, 2019 and September 17, 2019 in vacuum sealed packages in the following sizes: whole salmon side, 2 lb., 1 lb., 8 oz., and 4 oz. The affected product is marked with the following lot numbers marked on the back of the packages: 7049, 7050, 7051, 7052, 7054, 7056, 7058, 7060, 7062, 7066.

The smoked salmon products were sold and distributed in ME, MA, VT, RI, NY, CT, PA, NJ, OH, UT, IA, TN, MN, CO, FL, AZ, WI, WA, GA, IL, VA, MI, TX. The products sold were through retail, wholesale and online orders.

**The affected product was sold frozen by Mill Stream Corp, but may have been thawed by retailers before sale. Consumers who purchased the product frozen are advised to keep it frozen until ready to use and thaw under refrigeration immediately before use.** If a consumer has refrigerated product subject to the recall, they should dispose of it immediately even if it does not look or smell spoiled.

Consumers with questions may contact the company at 207-266-0621, Monday-Friday, 8am-5pm EST.

This recall is being made with the knowledge of the U.S. Food and Drug Administration.
