Currently, IDPH is reporting a total of 283,885 cases, including 8,563 deaths, in 102 counties in Illinois. The age of cases ranges from younger than one to older than 100 years. The preliminary seven-day statewide positivity for cases as a percent of total test from September 18 – September 24 is 3.6%. Within the past 24 hours, laboratories have reported 69,793 specimens for a total of 5,363,471. As of last night, 1,637 people in Illinois were reported to be in the hospital with COVID-19. Of those, 371 patients were in the ICU and 124 patients with COVID-19 were on ventilators.

Following guidance from the Centers for Disease Control and Prevention, IDPH is now reporting separately both confirmed and probable cases and deaths on its [website](#). Reporting probable cases will help show the potential burden of COVID-19 illness and efficacy of population-based non-pharmaceutical interventions. IDPH will update these data once a week.

*All data are provisional and will change. In order to rapidly report COVID-19 information to the public, data are being reported in real-time. Information is constantly being entered into an electronic system and the number of cases and deaths can change as additional information is gathered.
